Members of the Regional Aquatics Monitoring Program (RAMP)

**Re: RAMP: Final 2005 Technical Report**

---

Dear RAMP Members:

Please find enclosed the final version of the 2005 Technical Report for the Regional Aquatics Monitoring Program (RAMP).

As in the past, we have included a printed copy of the main body of the technical report as well as a CD containing the report and associated appendices. The electronic version has been formatted to allow easy printing or electronic review of individual report chapters.

In addition, the enclosed CD includes a complete copy of the 2004 Technical Report that was revised and distributed in November 2005. At that time, the Steering Committee decided to re-distribute a digital copy of the November 2005 Revision with the 2005 Technical Report as part of a multi-tiered approach to ensure that the correct information was widely available to all members and interested stakeholders.

Thank you for your contribution and interest in the RAMP and the 2005 Technical Report. If you have any comments regarding the report, please feel free to contact me at your convenience.

Sincerely,

Dr. Wade N. Gibbons, R.P.Bio.  
Principal, Senior Environmental Scientist
