Acid-Sensitive Lakes Monitoring Location Names

In 2015 AEMERA started to use new station names for its Joint Oilsands Monitoring Plan stations. Stations monitored in 2015 will now have a new display name, and will include data gathered prior-to 2015 at the same location. Data for stations not monitored in 2015 are available under prior station names. The *NoxSox Lake Sensitivity Mapping Program Id Number* column represents the NoxSox sample location ID derived from a Lake Sensitivity Mapping Program conducted by NSMWG (WRS 2004)
